## **PREMIER II PADS** [NEW]

### **LIGHTWEIGHT PERFORMANCE**

The Premier II goal pad is re-engineered to be 20% lighter than the previous generation and built for performance to dominate the crease. A dual density core eliminates excess weight while providing improved torsional strength to maximize coverage and stability and help the pad seal to the ice. A redesigned leg channel optimizes rotation. Increasing butterfly drop velocity and recovery.

### **LITECORE TECHNOLOGY**

20% lighter core than Premier with structural integrity to help the pad seal to the ice.

### **MAX REBOUND TECHNOLOGY**

Directional energy transfer foam offers powerful rebound, eliminating the second shot.

### **QUICK MOTION STRAP SYSTEM**

Responsive system for faster drop velocity and butterfly recovery.

# PREMIER PADS

Re-engineered injection molded inner core design with thinner profile to reduce weight where it matters to maximize performance. The three molded core designs are offered to provide flex options from below the knee up to the thigh to maximize your five-hole coverage based on how wide or narrow your butterfly is.

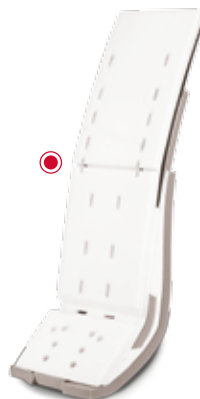

## CORE OPTIONS

### NO BREAK CORE

THE NO BREAK GOAL PAD IS DESIGNED TO BE A STIFFER GOAL PAD TO PROVIDE SOLID SEAL TO THE ICE.

\*OFFERED IN PRECURVED & STRAIGHT.

### SINGLE BREAK CORE

THE SINGLE BREAK CORE IS DESIGNED TO BE A STIFFER PAD WITH ONE INTERNAL BREAK BELOW THE KNEE FOR FLEXIBILITY AND MOBILITY.

\*OFFERED IN PRECURVED & STRAIGHT.

### DOUBLE BREAK CORE

THE DOUBLE BREAK CORE IS DESIGNED WITH 2 INTERNAL BREAKS ABOVE AND BELOW THE KNEE TO FACILITATE 5 HOLE CLOSURE.

\*OFFERED IN PRECURVED ONLY.

Flex options optimize internal and external flex points that can provide maximum coverage based on the width of your butterfly and desired flexibility above the knee.

## INNER LEG CHANNEL / CALF STRAP OPTIONS

Leg channel options provide goalies with the ability to customize their fit. A tight fit is designed to provide a secure feel of the pad centered on the leg. Goalies with less flexibility prefer a loose fit and open leg channel, which provide more room for the knee and calf to position closer to the inside edge.

## KNEE STRAP OPTIONS

The best knee strap option will allow proper rotation of the knee in the knee cradle. The size of knee protector that the goalie is wearing will determine whether the knee strap should be at the knee or below the knee for increased range of motion.

The leg channel is a personal preference based on whether the goalie wants a loose or tight fit. A tight fit leg channel works best with a shallow ultra soft EPE core. If a loose fit leg channel is desired it is best to select a shallow soft EPE core.

## GOALIE LEG PAD

- 1- Measure the distance from the floor (bare foot) to the middle of the knee cap, straight up, knee slightly bent.
- 2- Take the height of the goalie.
- 3- Look at the chart and try size accordingly.
- 4- Thigh rise sizing are based off goalie's personal preference.

## JAMBIÈRE DE GARDIEN

- 1- Mesurez la distance entre le sol (pied nu) et le milieu du genou, droit, le genou légèrement penché.
- 2- Prenez le dessus du gardien de but.
- 3- Regardez le graphique et essayez la taille en conséquence.
- 4- La taille de la cuisse est basée sur la préférence personnelle du gardien de but.

## **PREMIER II** **[NEW]**

Building on the success of the Premier Plus, the new and improved Premier II not only delivers great performance and feel, but also uncompromised durability. For the first time, it will feature Sigmatex spread-tow technology on the paddle and shaft, providing increased strength while maintaining a light weight. The design of the stick has also been taken to the next level with the use of a light-colored Sigmatex spread-tow. Lastly, the durability of the shaft has been greatly enhanced with the addition of Sigmatex as well as improved shaft compaction and overall consistency.

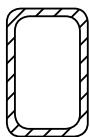

### **SILVER SIGMATEX SPREAD-TOW TECHNOLOGY**

Improves performance due to its lighter weight while providing great strength on the paddle and shaft. The lighter design appeals to goalies while eliminating the weight added by extra paint.

### **SHAFT IMPROVEMENTS**

Better consistency in shaft compaction minimizes weak points, providing greater corner strength.

### **ADDED FEEL**

Dampening of vibrations due to ZeroFlux technology gives goalie better rebound control while providing great shooting and passing control.

## EXTREME FLEX III STICK NEW

Our new Extreme Flex III foam core line is the result of close collaboration with our NHL goalies. By improving the consistency and weight of our shafts, we are able to deliver a level of performance that is unmatched while providing goalies the traditional feel they are looking for. A big emphasis was also placed on developing junior sticks that are better designed for the needs of younger goalies. Everything from the flex profile to the blade has been improved.

## APPROVED BY PRO

The new Extreme Flex III was developed by working closely with our Pro goalies. It has already allowed us to switch even more NHL goalies to our Extreme Flex III stick.

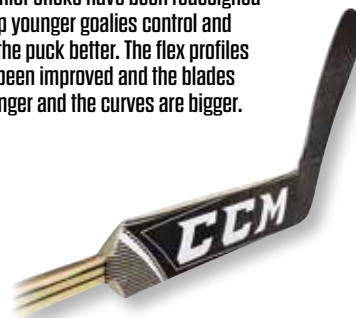

## CONSISTENT PERFORMANCE AND FEEL

The shaft has been improved to be lighter, but also a lot more consistent. This ensures that goalies can rely on the same great performance and feel each time they step on the ice.

## IMPROVED JUNIOR STICKS

Our junior sticks have been redesigned to help younger goalies control and pass the puck better. The flex profiles have been improved and the blades are longer and the curves are bigger.
